

VT Tyndall Real Income Fund

January 2019

TYNDALL

Fund Aims and Objectives

- The fund aims to generate real income and capital growth.

Investment Approach

- Our focus is on companies that have the capability to consistently generate dividends, even in difficult economic times.
- We look for strong management teams overseeing outstanding assets.
- These are companies that are established and confident enough to reward their shareholders with dividends, but also have the opportunity to reinvest in their business to sustain future growth and dividends.
- We take a broader perspective than the recent past and the immediate future.
- There are no market capitalisation or geographic constraints.
- We would expect the majority of the fund to be consistently invested in UK domiciled companies in the FTSE 350 Index but have the flexibility to invest in other asset classes, such as bonds or cash, if appropriate.

About Tyndall Investment Management

Tyndall Investment Management was founded as an antidote to the mainstream investment industry. Our focus is on generating real returns and adhering to the core values of clarity, patience, value, independence and personal accountability.

We have no external shareholders or need of committees. Our emphasis is on long term sustainable income growth. This is often at odds with the industry's more populist, bench mark driven culture, but we prefer to attract clients with a reputation for excellence, rather than the promotion of short term statistics.

We are long term investors and confident that, by fully aligning our aims and interests with those of our investors, their trust will be rewarded with a rising income and returns over time.

Manager Profile

Prior to launching the Real Income Fund, Alex managed income funds at M&G, including their £1.3 billion Dividend Fund, and Jupiter where he was the assistant fund manager of the flagship Income Trust. Alex began his career at PWC.
